

CHURCH COMMUNITY BUILDER

About Us

We exist to build software that doesn't just manage ministry, but maximizes it! At Church Community Builder, we don't just believe everyone should belong, we build software because we believe everyone COULD belong. We are passionately pursuing a world where the local Church is a place for people to be fully known and fully loved. That's why we're continually working to build the most relational and powerful Church management software there is.

How You Will Contribute

You'll work on a variety of features and cutting edge apps. You will work closely with other first rate developers while learning new skills. We are a highly collaborative environment so be prepared to discuss architectural, design, and coding best practices on a daily basis.

What We Are Looking For

We are looking for developers who have knowledge and experience using MySQL, PHP, React, and React Native. If clean, tested code is your thing, we'd love to invite you to take our coding challenge.

Coding Challenge

We want to give you the opportunity to showcase your coding ability and demonstrate your skills. Show us what you got! *Check out the README*
